

Sisterlocks Trichology Analyst Practical Applications

The Sisterlocks Trichology Analyst Certification will equip you to offer the following services to your clients:

- Offer Hair Wellness workshops for your clients. Suggested topics:
 - “Is My Hair Healthy”
 - “Is My Scalp Healthy”
 - “Long-Term Maintenance Tips for Healthy Hair and Scalp”
 - “Why Does Hair Loss Occur – Even in Natural Hair?”
 - “How to Select the Right Products”
 - “To Dye? Or Not To Dye?”

- Offer “Hair Coaching” sessions for your individual clients that include an overall assessment of the hair and scalp (using questionnaire and magnifying scope) and recommendations for a preventive maintenance regimen for maximum protection against hair loss.

- Collaborate with a Trichologist partner, to offer the following to your clients who are experiencing hair loss:
 - Investigate and assess the causes of hair loss at various stages
 - Offer therapies for various stages of hair loss with the goal of reviving and restoring hair growth whenever possible. Therapies include, but are not limited to the following:
 - Cosmetic remedies
 - Offer a regimen for applying scalp enzyme mask
 - Assist clients in identifying offending products
 - Assist clients in identifying offending maintenance practices
 - Coach clients in the proper use of Sisterlocks products
 - Teach clients scalp manipulation therapies (preventive and therapeutic)
 - Medicinal remedies
 - Offer referrals to and/or collaboration with dermatologists, gynecologists,
 - Help clients manage therapies from medical practitioners related to hair loss
 - Side effects from medications.
 - The Compliment
 - Perform a “needs assessment” on clients with chronic, advanced or permanent hair loss issues
 - Perform proper sizing of the Compliment unit
 - Perform proper long-term maintenance of the unit

Training Includes:

- 2-5 hour prerequisite (self-paced) to master relevant terminology. (Complete practice tests online before class begins.)
- 16 hours of face-to-face directed learning using helpful modules to visually anchor core concepts.
- Learn how to do a hair loss assessment consultation to document condition of hair and scalp
- Observe demonstrations of hair loss client consultations
- Carry out consultations under observation
- Receive training in fitting and managing “The Complimenttm” hair loss unit
